

## IWATA IS 800 Sprint Jet Compressor

1/8 HP • No Tank

Working Pressure 1-25 psi

Iwata Sprint Jet airbrush compressor is compact and quiet producing a preset working pressure of 20-25 PSI. It is a good choice for general purpose applications that require low to medium air pressure.

The moisture filter prevents pulsation while trapping condensation and delivering clean, dry air. The mounted air pressure gauge displays the air pressure and if desired, the bleed valve may be used to lower the working pressure below the preset range. The Sprint Jet has an air intake filter that protects the motor from dust and particulates and allows easy-access for quick filter changes.
