

IWATA IS 925 Power Jet Lite Compressor

1/6 HP • No Tank

Working Pressure 1-60 psi

Iwata Power Jet Lite airbrush compressor is quiet, low maintenance and produces low to high output and working pressures of 1-50 PSI.

Auto shut-off technology enables the compressor to shut itself off when not in use. This feature upgrade is known to lengthen the life span of the compressor motor because it reduces the workload of the motor over time. Iwata Power Jet Lite has a moisture filter that prevents pulsation and traps condensation, delivering clean, dry air. The fully adjustable air regulator is controlled with the regulator knob and the gauge displays precise air pressure. The strong, protective outer case adds durability and includes a mounted airbrush holder. The modern Power Jet Lite has an air intake filter that protects the motor from dust and particulate and allows easy-access for quick filter changes.
