Iwata Custom Micron Takumi Side Feed Dual Action Airbrush

Mastering a craft might take a lifetime. Hours of practice and years of study until the hand and the mind become one: until there is no distance between the imagination and the materials. In Japan, such skilled artisans are called Takumi.

Iwata Custom Micron Takumi Side Feed Airbrush has a redesigned, compact body style that makes it exceptionally balanced in the hand. This, combined with a new gravity assisted side feed cup and siphon cut lid improves paint flow, making Takumi remarkably responsive. The two-piece 0.24 oz / 7 ml cup design disassembles for easy cleaning.

Who sprays with Iwata Custom Micron Takumi Side Feed Dual Action Airbrush?

- Artisans looking for unparalleled responsiveness and balance
- Professional painters or hobbyists with high level airbrush skills
- Painters using fine to extreme detail and scale
- Those using thin spray material or who are skilled at reducing paint for optimal flow
- Right or left-handed users
- 0.10 oz / 3 ml cup option sold separately
